

Archive Accelerator Restore For Veritas Enterprise Vault™

Veritas Enterprise Vault™ is one of the most powerful platforms for e-mail and content archiving.

When customers require flexibility in rehydrating messages back to a user's mailbox, they turn to Vault Solutions LLC's Archive Accelerator Restore.

The restore feature built into Enterprise Vault typically returns all items, including items that correspond to deleted shortcuts and unwanted messages to the mailboxes. Archive Accelerator Restore empowers administrators to restore all items easily and quickly or just those with shortcuts in the mailbox.

Its unattended mode allows you to schedule multiple concurrent restores at convenient times, such as evenings or on weekends. Included is the ability to restore items for which there are no shortcuts in the mailbox. Archive Accelerator Restore runs multi-process multi-threaded for enhanced throughput.

The restoration process is managed by administrators via the Archive Accelerator Management Console.

Targets include Exchange Mailboxes, Exchange Personal Archives, and Exchange Online Mailboxes and Online archives. Archive Accelerator also has the ability to migrate journal archived data to Exchange Online.

The solution is capable of processing multiple mailboxes simultaneously. Infrastructure requirements are minimal, and with no intermediate storage necessary. In addition, messages can start migrating immediately after installation.

Archive Accelerator can typically process up to 400,000 messages per hour!

Key Features:

Option to restore all items or only those with mailbox shortcuts

Restores to multiple mailboxes simultaneously

Can restore directly to Exchange Online

Direction Migration for industry leading performance

Complete audit trail for purposes of chain of custody

Supports modern authentication

At Vault Solutions LLC, we provide software applications and services to customers and partners of Microsoft 365 and Enterprise Vault™ product lines. For 18 years, we have been dedicated to providing innovative Information Management solutions to top-tier global enterprises.
